Director, Emergency Medical Services Authority

SUBJECT: Interim Emergency Medical Services Guidelines for COVID-19

The outbreak of respiratory illness caused by the novel coronavirus (COVID-19) was first detected in China during December 2019, and has now been identified in over 60 locations internationally, including the United States. We are beginning to see community transmission and deaths in the US, including California, and we must remain vigilant with our approach to EMS patients who may have COVID-19. On March 4th, Governor Newsom declared a State of Emergency for California regarding the novel coronavirus.

The California Emergency Medical Services Authority (EMSA) has developed comprehensive guidance for its EMS partners, providers and agencies. This guidance has been developed in conjunction with the California Department of Public Health (CDPH) and the Governor's Office of Emergency Services (Cal OES), as well as our federal and local partners including the Center for Disease Control (CDC) and the Local Emergency Medical Services Agencies (LEMSAs)

The California Emergency Medical Services Authority has adopted the standardized EMS guidance provided by the CDC in collaboration with the National Highway Traffic Safety Administration (NHTSA). This guidance for EMS is comprehensive, represents a recognized best practice across the nation, and is currently deployed within the 33 LEMSAs throughout the state.

#### California EMS Guidance and Resources for COVID-19

#### 1) Interim Guidance for EMS and 911 PSAPs for COVID-19 in California.

This comprehensive EMS guidance applies to all first responders who anticipate close contact with persons with possible or confirmed COVID-19 in the course of their work. This guidance discusses modifying caller queries to determine the possibility that this call concerns a person who may have signs or symptoms and risk factors for COVID-19. Patients in the United States who meet the appropriate criteria should be evaluated and transported as a person under investigation (PUI).

A summary of the sections found in this document are listed here:

#### 2) Guidance regarding shortage of N95 Respirators.

On March 3rd, Governor Newsom and state health officials announced that millions of stockpiled masks will become available.

The CDC has also recently published information regarding N95 respirators including the use of stockpiled N95 Respirators:

https://www.cdc.gov/coronavirus/2019-ncov/release-stockpiled-N95.html and strategies for optimizing the supply of N95 respirators:

https://www.cdc.gov/coronavirus/2019-ncov/hcp/respirators-strategy/index.html

#### 3) Identifying Patients Under Investigation (PUI's).

Local health departments, in consultation with clinicians, should determine whether a patient is a PUI for COVID-2019. The CDC clinical criteria for COVID-19 PUIs have been developed based on available information about this novel virus, as well as what is known about Severe Acute Respiratory Syndrome (SARS) and Middle East Respiratory Syndrome (MERS). These criteria are subject to change as additional information becomes available.

#### **SEQUENCE FOR PUTTING ON** PERSONAL PROTECTIVE EQUIPMENT (PPE)

The type of PPE used will vary based on the level of precautions required, such as standard and contact, droplet or airborne infection isolation precautions. The procedure for putting on and removing PPE should be tailored to the specific type of PPE.

#### 1. GOWN

- · Fully cover torso from neck to knees, arms to end of wrists, and wrap around the back
- Fasten in back of neck and waist

#### 2. MASK OR RESPIRATOR

- Secure ties or elastic bands at middle of head and neck
- Fit flexible band to nose bridge
- Fit snug to face and below chin
- Fit-check respirator

#### 3. GOGGLES OR FACE SHIELD

Place over face and eyes and adjust to fit

#### 4. GLOVES

Extend to cover wrist of isolation gown

#### **USE SAFE WORK PRACTICES TO PROTECT YOURSELF** AND LIMIT THE SPREAD OF CONTAMINATION

- Keep hands away from face
- · Limit surfaces touched
- · Change gloves when torn or heavily contaminated
- Perform hand hygiene

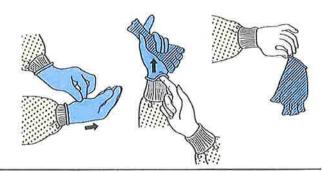

## HOW TO SAFELY REMOVE PERSONAL PROTECTIVE EQUIPMENT (PPE) EXAMPLE 1

There are a variety of ways to safely remove PPE without contaminating your clothing, skin, or mucous membranes with potentially infectious materials. Here is one example. **Remove all PPE before exiting the patient room** except a respirator, if worn. Remove the respirator after leaving the patient room and closing the door. Remove PPE in the following sequence:

#### 1. GLOVES

- · Outside of gloves are contaminated!
- If your hands get contaminated during glove removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Using a gloved hand, grasp the palm area of the other gloved hand and peel off first glove
- · Hold removed glove in gloved hand
- Slide fingers of ungloved hand under remaining glove at wrist and peel off second glove over first glove
- · Discard gloves in a waste container

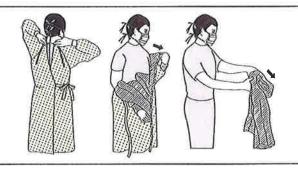

#### 2. GOGGLES OR FACE SHIELD

- · Outside of goggles or face shield are contaminated!
- If your hands get contaminated during goggle or face shield removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Remove goggles or face shield from the back by lifting head band or ear pieces
- If the item is reusable, place in designated receptacle for reprocessing. Otherwise, discard in a waste container

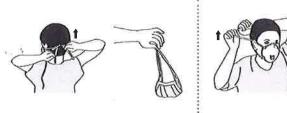

#### 3. GOWN

- · Gown front and sleeves are contaminated!
- If your hands get contaminated during gown removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Unfasten gown ties, taking care that sleeves don't contact your body when reaching for ties
- Pull gown away from neck and shoulders, touching inside of gown only
- Turn gown inside out
- Fold or roll into a bundle and discard in a waste container

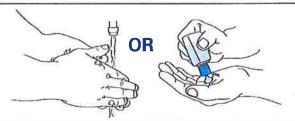

#### 4. MASK OR RESPIRATOR

- Front of mask/respirator is contaminated DO NOT TOUCH!
- If your hands get contaminated during mask/respirator removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Grasp bottom ties or elastics of the mask/respirator, then the ones at the top, and remove without touching the front
- . Discard in a waste container

# 5. WASH HANDS OR USE AN ALCOHOL-BASED HAND SANITIZER IMMEDIATELY AFTER REMOVING ALL PPE

PERFORM HAND HYGIENE BETWEEN STEPS IF HANDS BECOME CONTAMINATED AND IMMEDIATELY AFTER REMOVING ALL PPE

Here is another way to safely remove PPE without contaminating your clothing, skin, or mucous membranes with potentially infectious materials. **Remove all PPE before exiting the patient roo**m except a respirator, if worn. Remove the respirator **after** leaving the patient room and closing the door. Remove PPE in the following sequence:

- If your hands get contaminated during gown or glove removal, immediately wash your hands or use an alcohol-based hand sanitizer
- Grasp the gown in the front and pull away from your body so that the ties break, touching outside of gown only with gloved hands
- While removing the gown, fold or roll the gown inside-out into a bundle
- As you are removing the gown, peel off your gloves at the same time, only touching the inside of the gloves and gown with your bare hands. Place the gown and gloves into a waste container

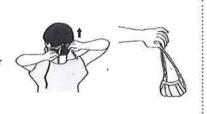

#### 2. GOGGLES OR FACE SHIELD

- · Outside of goggles or face shield are contaminated!
- If your hands get contaminated during goggle or face shield removal, immediately wash your hands or use an alcohol-based hand sanitizer
