- Our first and last hour of operation are generally very slow which is ideal for those seeking to limit their exposure to others while shopping.
- We will continue our extraordinary cleaning and sanitation efforts to ensure your shopping environment is as safe as possible.
- The safest way to pay in this order is; Contactless Credit (Apple Pay), Credit/Debit, Check. Cash should be a last resort and make sure you wash your hands after handling cash.
- Frequent handwashing with soap is still the most effective way of protecting your health and those in our community.

Additionally, we will be reaching out to local organizations in our communities to determine if there are other methods to get essential products to those at risk without any unnecessary exposure to others. We appreciate your patience as we continue to work 24/7 to replenish product to our shelves as quickly as possible for all of our customers.
